

LTB-48B CROSSBAR SETUP

1. Set up tripod stand following enclosed instructions.
2. Assemble each T-fitting with the 3 Handknobs. Install hex nuts, insert Handknob with washer - loosely tighten Handknobs.
3. Slide T-fitting to middle of the Crossbar Tube. Leave Handknob loose.
4. Optional: Slide one Universal Fitting for dimmer packs on the Tube - place on either side of the T-fitting. Install Handknobs.
5. Slide T-Fitting over top tube of the tripod stand and tighten corresponding Handknobs onto top tube. Tighten Handknob for the Crossbar Tube.
6. Assemble mounting Hardware through par can yoke or other lighting effect in order shown (bolt, washer, saddle, tube, saddle, washer, t-nut). OR tighten C-clamps directly onto the tube.
7. Raise height of lighting tree following enclosed tripod instructions.
